EDUCATIONAL TRANSFORMATION
University of Northern Iowa

COLLEGE OF EDUCATION *Leaders. Scholars. Innovators.*

Agenda

- Provide context for existing work in data-based individualization
 - Focus on self-monitoring interventions
- Introduce the DBI framework
- Describe results of recent teacher training and research in DBI
 - Student outcomes
 - Teacher perceptions

COLLEGE OF EDUCATION *Leaders. Scholars. Innovators.*

The Marshmallow Test

COLLEGE OF EDUCATION *Leaders. Scholars. Innovators.*

Self-Determination

- Overarching term for a group of related skills, beliefs, and behaviors aimed at improving the quality of life through achieving independence across the life span
 - *Subcategories:* choice-making, decision-making, goal-setting, problem-solving, self-advocacy, self-efficacy, self-knowledge, and self-management/regulation (Wehrymeyer & Field, 2007)

COLLEGE OF EDUCATION *Leaders. Scholars. Innovators.*

Self-Determination

- Unfortunately, many students with and at-risk for emotional and behavioral disorders lack self-determination skills such as self-regulation
 - These skills are critical for academic success and developing positive social relationships (Cameto, Levine, Wagner, & Marder, 2004; Carter, Lane Pierson, & Glaser, 2008)

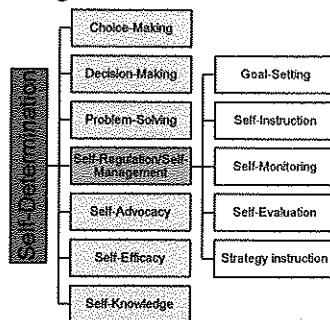

COLLEGE OF EDUCATION *Leaders. Scholars. Innovators.*

What does it mean to be a self-regulated learner? (Arshan, 2014)

- Establish goal
- Determine strategies that support progress toward that goal
- Apply strategies
- Monitor progress toward goal

A focus on self-regulation/self-management

What is self-monitoring?

- A meta-cognitive skill that involves:
 - (a) teaching students to be aware of their behavior, and then
 - (b) students recording whether or not the behavior occurred
- Additional components:
 - Reinforcement
 - Feedback
 - Technology
 - Graphing

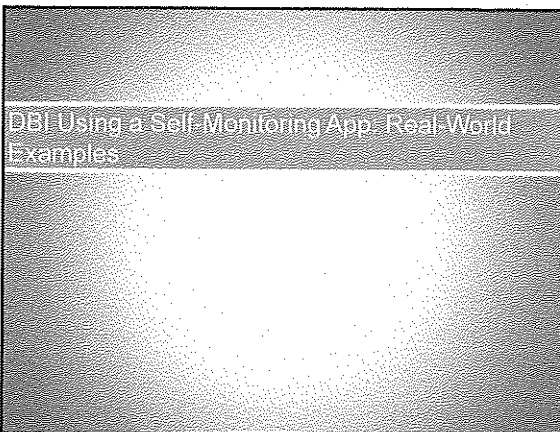

Example of "in the moment" self-monitoring: Are you in your seat right now?

Behavior: in Seat		
Interval	Yes	No
1:00	X	
2:00	X	
3:00		X
4:00	X	
5:00		X
6:00	X	
7:00	X	
8:00	X	
9:00	X	
10:00	X	
Total	80%	20%

Goal: During math class, Juan will be in his seat for 80% of intervals each day for a week.

Example of "retrospective" self-monitoring: Did you meet classroom expectations during whole group instruction?

Self-Monitoring Intervention App

11/2/16

Who are you?

COLLEGE OF EDUCATION
Leaders. Scholars. Innovators.

Henry

- 6th grade student
- Special education services in Level III classroom
- Long, complex behavior history (e.g. eloping, tantrums, police, etc.)
- 21 ODRs in previous year
- SDQ: scored in abnormal range on conduct problems and hyperactivity/inattention
- SSIS: bottom 1% for social skills, 82% for problem behavior
- Beginning reader (BR) according to Scholastic Reading Inventory (SRI)—schoolwide reading screener

Bruhn, Vogelgesang, Fernando, & Lugo, 2016

COLLEGE OF EDUCATION
Leaders. Scholars. Innovators.

Trey

- White, 7th grade, male
- Poor home life
- Lack of engagement
- SDQ: total difficulties = slightly raised to high risk

Tl Soc S1 = 100%
Tl Science = 100%
IOAAE = 90-100%
IOADB = 94-100%

Bruhn, Woods-Groves, Fernando, Choi, & Troughton (in press)

COLLEGE OF EDUCATION
Leaders. Scholars. Innovators.

Anna

- White, 6th grade, female
- IEP with reading & math goals, no behavioral goals (despite ADHD, OCD, PTSD)
- Lack of engagement, highly disruptive & defiant
- SDQ: Total difficulties = very high risk

Tl Science = 80-100%
Tl Math = 67-100% (A = 91%)
IOAAE = 80-99%
IOADB = 91-100%

Bruhn, Woods-Groves, Fernando, Choi, & Troughton (in press)

COLLEGE OF EDUCATION
Leaders. Scholars. Innovators.

Building Capacity

- How can we get teachers to provide high-quality intervention and make data-based decisions within intervention?
- Can we teach them a systematic process that is effective, useful, and feasible?

COLLEGE OF EDUCATION
Leaders. Scholars. Innovators.

The DBI Framework

DBI Framework
Workshop (2017-18)
Monday, 10/23/17 9:00am
Tuesday, 10/24/17 5:00pm

Data-Based Individualization (DBI)

- DBI is “a systematic method for using data to determine when and how to provide more intense (or less intense) intervention”
 - DBI is a process, NOT a single intervention or strategy
 - DBI is NOT a one-time fix
 - On-going process of intervention and assessment adjusted over time

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 19

Adapted DBI

The diagram shows a vertical flow of steps: Individualized Instruction, Progress Monitor, Supplemental Academic Assessment, Intervention Adjustment, and Progress Monitor. It includes feedback loops for 'more' and 'less' intensity adjustments. A 'Response' box is also shown.

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 20

Step 1: Collect Baseline Data

The diagram shows a vertical flow of steps: Individualized Instruction, Progress Monitor, Supplemental Academic Assessment, Intervention Adjustment, and Progress Monitor. An arrow points from the 'Progress Monitor' step to the text on the right.

- What are baseline data?
 - Data collected prior to intervention being in place
- Why collect baseline data?
 - Comparison to intervention data—is intervention working?
- When and how long do I collect baseline data?
 - No rules, 3-5 days recommended
- How do I collect baseline data?
 - Select method of measurement (intervention dependent)

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 1

Step 2: Implement Intervention

The diagram shows a vertical flow of steps: Individualized Instruction, Progress Monitor, Supplemental Academic Assessment, Intervention Adjustment, and Progress Monitor. An arrow points from the 'Intervention Adjustment' step to the text on the right.

- Plan, Prep, & Practice
- Did the student receive adequate training on the intervention?
 - Teach, Model, Practice
- Has the intervention been implemented for an amount of time to allow for a response?
 - Create calendar
- Has the intervention been implemented with fidelity?
 - ALL components, ALL the time

Don't do two things half-ass. Do one thing whole-ass. -Lester

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 2

Step 3: Progress Monitor

The diagram shows a vertical flow of steps: Individualized Instruction, Progress Monitor, Supplemental Academic Assessment, Intervention Adjustment, and Progress Monitor. An arrow points from the 'Progress Monitor' step to the text on the right.

- Do data indicate the student is responding to intervention?
 - Graph data and observe graph to determine:
 - How does the behavior compare to baseline?
 - Is the behavior better or worse?
 - Is the behavior stable?

The graph shows behavior levels on the y-axis (0-100) and time on the x-axis. The 'Baseline' phase shows fluctuating behavior between 20 and 40. The 'Intervention' phase shows a sharp increase in behavior, stabilizing between 70 and 80.

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 3

Step 3: Progress Monitor

- Do data indicate the student is responding to intervention?
 - No = nonresponder
 - Yes = responder

The graph shows behavior levels on the y-axis (0-100) and time on the x-axis. The 'Baseline' phase shows fluctuating behavior between 20 and 40. The 'Intervention' phase shows a sharp increase in behavior, stabilizing between 70 and 80.

COLLEGE OF EDUCATION *Teacher, Student, Intervention* 4

Step 3: Progress Monitor

- Do data indicate the student is responding to intervention?
 - No = nonresponder
 - Yes = responder

Step 4: Intervention Adaptation

- Nonresponders = intensify intervention
- Responders = fade intervention (or continue as is and progress monitor)

We should continue to monitor the same thing for responders and nonresponders!

Step 4: Intervention Adaptation

- | NONRESPONDERS | RESPONDERS |
|---|--|
| <ul style="list-style-type: none"> Goal <ul style="list-style-type: none"> Lower the goal Frequency <ul style="list-style-type: none"> Increase the frequency of intervention Feedback <ul style="list-style-type: none"> Increase the frequency of feedback Reinforcement <ul style="list-style-type: none"> Add a reward for meeting the daily goal Provide reward choice Add Components <ul style="list-style-type: none"> Self-graphing Prompts/incidental teaching Check-Ins | <ul style="list-style-type: none"> Goal <ul style="list-style-type: none"> Raise the goal Frequency <ul style="list-style-type: none"> Decrease the frequency of intervention Feedback <ul style="list-style-type: none"> Provide less frequent feedback Reinforcement <ul style="list-style-type: none"> Increase the contingencies (e.g., must meet goal 3 days in a row to receive reward) Change the reward, provide choice Fade to praise only Remove Components |

Step 5: Diagnostic/FBA for Nonresponders

- Academic assessments
 - CBM
 - Other standardized tools
- Behavioral screening tools
 - SDQ
 - BASC-2
 - SSIS
- Functional Behavior Assessment (FBA)
 - Interviews
 - Records review
 - Direct observation (A-B-C)

Data-Based Individualization

- DBI is "a systematic method for using data to determine when and how to provide more intense (or less intense) intervention"
 - DBI is a process, NOT a single intervention or strategy
 - DBI is NOT a one-time fix
 - On-going process of intervention and assessment adjusted over time

"Improving Intervention Implementation Using Data-Based Individualization"

- 16 gen ed/sped teachers (4th-6th grade) attending 5-part professional development series (Nov-Mar)
 - All running their own studies with a student demonstrating challenging behavior
 - Graduate assistants collecting fidelity data 1x/wk
 - Mixed-method analysis (Student outcomes = single-subject & descriptive; Teacher outcomes = qualitative & quantitative)

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

- Student Outcomes:
 - What are the effects of data-based individualization within technology-based self-monitoring on 4th-6th grade students with serious challenging behavior?
- Teacher Outcomes:
 - What are teachers' perceptions of their understanding of, self-efficacy in using, and utility of data-based individualization before, during, and after training and implementation?

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

Session 1: Introduction to Self-Monitoring (NOVEMBER 8th 2016; 1/2 day)

Content Objectives:	Implementation Objectives:	Evaluation Objectives:
Participants will... 1. Learn about self-monitoring (what it is, who can benefit from it, research on effects) 2. Learn about self-monitoring (what it is, who can benefit from it research on effects, how to use it) 3. Practice using self-monitoring app	Participants will... 1. Create a list of potential students who meet inclusion criteria 2. Review consent forms 3. Take consent forms to school and send home to parents of students meeting criteria	Participants will... 1. Complete pre-self-assessment

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

Session 2: Introduction to Data-Based Individualization (DECEMBER 6th 2016; 1/2 day)

Content Objectives:	Implementation Objectives:	Evaluation Objectives:
Participants will... 1. Learn about DBI (what it is, why it is important) 2. Discuss DBI in terms of app (how to individualize based on app data) 3. Practice DBI by analyzing data sets and making decisions 4. Program app for use (i.e., student name, behavior to be measured, interval system)	Participants will... 1. Return signed consent forms 2. Create implementation calendar for collecting baseline data using app and pre-assessment data	Participants will... 1. Complete IRP-15 pre-assessment

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

Session 3: Baseline Data and Intervention Implementation (JANUARY 17th 2017; 2 hr)

Content Objectives:	Implementation Objectives:	Evaluation Objectives:
Participants will... 1. Review DBI 2. Analyze baseline data from student participants	Participants will... 1. Create implementation plan and calendar for student self-monitoring using app	Participants will... 1. Return pre-assessment (2 nd quarter) and baseline data 2. Complete mid-self-assessment

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

Session 4: Intervention Data Analysis (FEBRUARY 7th 2017; 2 hr)

Content Objectives:	Implementation Objectives:	Evaluation Objectives:
Participants will... 1. Analyze intervention data from student participants 2. Discuss DBI decisions about continuing, adapting, or discontinuing app	Participants will... 1. Revise implementation plan and calendar based on discussions of DBI decisions	Participants will... 1. Engage in semi-structured interviews about usability and feasibility of app and DBI

COLLEGE OF EDUCATION

Leaders. Scholars. Innovators.

"Improving Intervention Implementation Using Data-Based Individualization"

Session 5: Final Analysis (MARCH 9th 2017: 2 hr)

Content Objectives: Participants will...	Implementation Objectives: Participants will...	Evaluation Objectives: Participants will...
1. Conduct summative analysis on all data collected within SCORE IT 2. Compare and contrast analyses with other participants	1. Revise implementation plan and calendar for 4 th quarter	1. Return post-assessment (3 rd quarter) data and intervention data 2. Complete post-self-assessment 3. Complete IRP-15

COLLEGE OF EDUCATION

Leaders, Scholars, Innovators

Participants: Teachers

- N = 16
- Years of experience = 3 to 35 (Mean = 15)
- 14 Female, 2 Male
- 12 White, 3 Black, 1 Mixed
- 4 BAs, 10 MAs, 2 PhDs,
- 4 SPED teachers, 12 Gen Ed teachers

COLLEGE OF EDUCATION

Leaders, Scholars, Innovators

Participants: Students

- N = 17
- 15 Male, 2 Female
- 11 White, 3 Black, 2 Mixed, 1 Hispanic
- 3rd grade = 2, 4th grade = 6, 5th grade = 5, 6th grade = 4
- Nominated due to high rates of off-task behavior & poor academic performance, ODRs or screening score, IEP behavioral goals, or EBD diagnosis

Individual & Self-Check one				
Site	Goal	Initial	Final	Response or Interdependency?

General Recommendations:

- Initial goal - No more than 10% above baseline mean
- Look at data every 3-5 days and make decision
- Change 1 variable at a time

COLLEGE OF EDUCATION

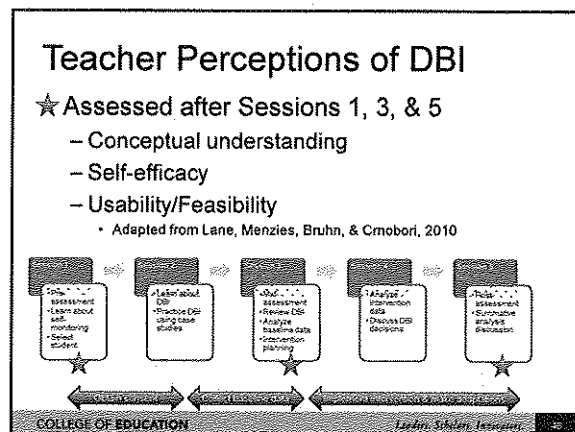

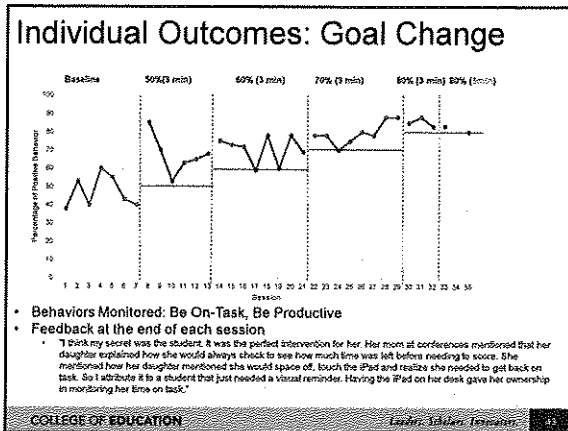

Leaders, Scholars, Innovators

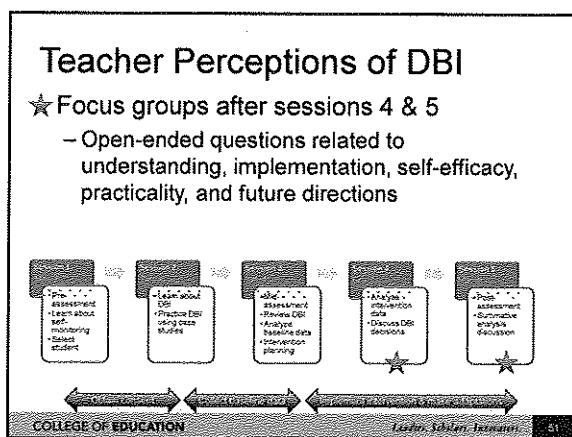

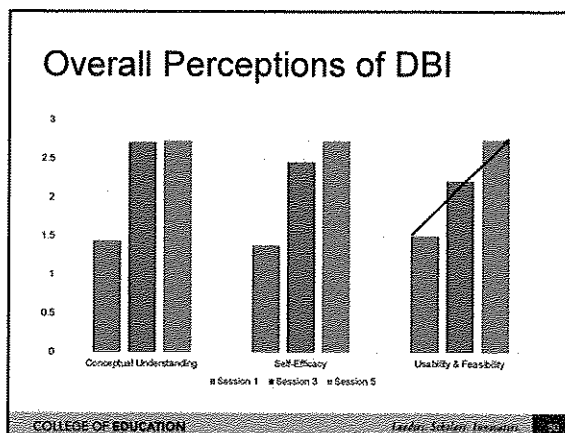

Overall Outcomes for Behavior

COLLEGE OF EDUCATION

Leaders, Scholars, Innovators

- ### How did using the app and data-based individualization fit into the structure and flow of your classroom?
- Due to the very hands-on nature of the class it has been a little tricky.
 - It could be interrupting if used while teacher is physically teaching and speaking to class.
 - It fits well but it does become hard to monitor actively when I'm with a guided reading group.
 - It interrupted the flow slightly... sometimes I have to stop working with a group or student to score.
 - I could see it being more challenging during whole group instruction.
 - It fits in easily and is very accessible no matter what we are doing in the classroom.
 - It has been good during independent work time.
 - Seamless at this point!
 - It was great for me because I got a good picture of how the student was doing in the gen ed classroom and I don't always get much time for that.
 - I feel making data-based decisions has been valuable. When we reflect on meeting the goal, you can see the student beam with pride.
- COLLEGE OF EDUCATION | Leader: Schellie Tenenbaum | 42

- ### If you were advising other teachers on self-monitoring and/or DBI, what advice would you give them?
- "Make sure to take baseline data."
 - "Be consistent... do what you set up to do."
 - "Implement with fidelity. Don't cut the intervention cold turkey and use the data to inform decisions, not just gut."
 - "Use the check-in time to build relationships."
- COLLEGE OF EDUCATION | Leader: Schellie Tenenbaum | 43

- ### After having been through this training series, would you feel comfortable implementing this same intervention and DBI with another student? Why or why not?
- "Yes, because it's very simple and very reflective for the student."
 - "Yes. First of all, other students are asking to use the iPad! But, yes, I was surprised that the intervention actually worked. So, I would be interested in trying this with other students as a way to intervene before I bring up the student as a behavior concern to our school team."
 - "Yes - After my kiddo was deemed a responder, I noticed many others who would benefit (mostly for off-task/attention behaviors)."
- COLLEGE OF EDUCATION | Leader: Schellie Tenenbaum | 44

Teacher Perceptions of Intervention

★ Assessed after session 2 (pre-implementation) and session 5 (post-implementation)

– Intervention Rating Profile-15 (IRP-15)

- 15 Items rated 1-6, Total possible = 90

COLLEGE OF EDUCATION *Leading. Shifting. Inspiring.*

Intervention Rating Profile-15

Item	Statement	Pre Average	Post Average
1	This is an acceptable intervention for the student's problem behavior.	5.00	5.44
2	Most teachers would find this intervention appropriate for behavior problems in addition to the one described.	4.63	5.06
3	This intervention should prove effective in changing the child's problem behavior.	4.63	5.00
4	I would suggest use of this intervention to other teachers.	4.38	5.56
5	The child's behavior problem is severe enough to warrant use of this intervention.	5.00	4.84
6	Most teachers would find this intervention suitable for the behavior problem described.	4.56	5.25
7	I would be willing to use this intervention in the classroom setting.	5.27	5.44
8	This intervention would not result in negative side-effects for the child.	4.44	5.44
9	This intervention would be appropriate for a variety of children.	4.88	5.38
10	This intervention is consistent with those I have used in classroom settings.	4.38	4.69
11	The intervention is a fair way to handle the child's problem behavior.	4.56	5.38
12	This intervention is responsible for the behavior problem described.	4.69	5.44
13	I like the procedures used in this intervention.	4.56	5.25
14	This intervention is a good way to handle this child's behavior problem.	4.75	5.38
15	Overall, this intervention would be beneficial for the child.	4.81	5.44
Total		70.19	79.06

$p = .0018$

COLLEGE OF EDUCATION *Leading. Shifting. Inspiring.*

Next Steps: What if we could get the app to help teachers with DBI by providing data-based recommendations?

Data-Based Individualization

COLLEGE OF EDUCATION *Leading. Shifting. Inspiring.*

Project SCORE IT: Developing and Evaluating Interactive Technology to Support Self-Monitoring and Data-Based Decision-Making

Year 1

- Pilot digitizing and data analysis of 80 self-monitoring studies
- Develop decision rules and apply them to existing data
- Teacher focus groups
- Reprogramming of app into "expert system"

Year 2

- Usability & feasibility testing across sites
- Adjustments to decision rules/programming

Year 3

- Randomized control trial across sites
- Adjustments to decision rules/programming
